

FUTURE|WORKPLACE

Increasing mobility and the consumerisation of technology can enable a more productive, empowered and motivated workforce.

Achieve greater flexibility, reduced operational costs, increased employee satisfaction and a more responsive approach to the needs of your customers.

PILLARS FOR PROGRESS

Across the financial services sector the pressures of regulatory intervention, customer mistrust, depressed demand and operational cost-cutting remain prevalent. Such an environment provides fertile ground for the growth of employee disaffection and a reduction in productivity.

Cable&Wireless Worldwide enables banking and financial services clients to utilise technology to underpin new working practices – in particular in front and back office functions – which reduce the total cost of ownership of employees whilst delivering improved employee engagement and enhanced productivity.

Our Future Workplace pillars are:

Informed future vision

Access anywhere

Business grade home offices

Remote integration

Secure mobility

Proven transformational process

KEY BENEFITS

- Improve employee satisfaction, motivation and productivity
- Reduce operational costs and increase efficiency
- Transition to more flexible, future-proofed working practices (with secure remote working)
- Improve your ability to respond to customer needs
- Improve retention of key talent and your ability to tap into new talent pools
- Improve collaboration and communication across geographically dispersed teams

WHAT OUR CUSTOMERS SAY

“Cable&Wireless Worldwide worked with me to move from a distributed Exchange platform of over 50 servers to a centrally hosted, dedicated Exchange 2007 platform. The project saved us nearly 40% over our in-house costs.”

IT DIRECTOR, GLOBAL ENGINEERING CONSULTANCY

CABLE&WIRELESS WORLDWIDE CAPABILITIES

INFORMED FUTURE VISION

Our Inform range of consulting services helps you create a vision for your future workplace and build a robust plan to achieve that vision. Our diagnostic tools will help you understand current workplace challenges and identify opportunities for cost savings and performance improvements. We'll remove the barriers to change by providing a structured transitional framework, which will enable you to realise the targeted benefits in a timely, risk-free manner.

Our Inform capabilities include our Cordless Group Think Tank, which enables you to explore the art of the possible in relation to your future workplace; our Virtual Desktop Readiness Audit, which assesses your readiness for Virtual Desktop Infrastructure (VDI); and our VoIP Readiness Assessment, which assesses your readiness for IP telephony.

ACCESS ANYWHERE

Driving business agility, cost reductions and improved service levels, we can enable you to improve your employees' work-life balance, save office space and reduce your carbon footprint.

Our Access Anywhere VDI technology can transform your workplace by virtualising/centralising the desktop environment whilst ensuring the security of your critical data. Our End-User Experience tool provides reporting and diagnostics about application performance at the user level rather than across the network, ensuring that your users enjoy a consistent level of performance wherever they are.

BUSINESS GRADE HOME OFFICES

We provide a range of solutions that enable the business grade home office of the future, supporting fast speeds, guaranteed bandwidth, improved productivity, lower costs, easy and instant collaboration, plus efficient remote worker management. Our solutions bring the benefits of remote working to your employees and your business.

Our offering includes business grade DSL via Demon for standard use (with an executive upgrade option), internet VPN, video, IP telephony and Fixed Mobile Convergence (FMC) at home.

To realise a stronger future for your business by enabling the future workplace today, simply contact us.

REMOTE INTEGRATION

We can reduce the need for travel and break down barriers in the workplace by enhancing remote communications and improving collaboration and the sharing of resources and knowledge. Enabling your workforce to share resources and knowledge, our collaboration tools increase efficiency, cut costs, improve productivity and encourage innovation.

Providing a broader range of communications than just voice and email, tools such as our Collaboration Platform and our Managed Video Conferencing System ensure that dispersed teams can work as integrated units, increasing efficiency, reducing costs, improving productivity and encouraging innovation.

SECURE MOBILITY

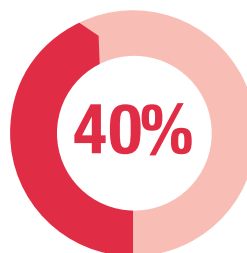

As employees become more mobile and remote working becomes the norm, it's vital that you have the necessary systems and processes in place to ensure complete data and network security and control.

Our Secure Mobility offering equips employees with secure, easy-to-use global access to their corporate data and applications, delivering freedom and flexibility without compromising the security of your corporate network. Secure Mobility can also extend to secure access for partner employees and from non-standard devices.

PROVEN TRANSFORMATIONAL PROCESS

We provide comprehensive change management solutions to address the people and process aspects of implementing new working practices.

Our approach ensures that new working practices and technologies are implemented and adopted successfully within the workplace, reducing the disruption and management overhead associated with implementing transformational change. Our professional services team not only focuses on gaining full employee engagement, but also looks to deliver real business benefits at an early stage.

More than 40% of the worldwide professional PC market will be Hosted Virtual Desktops (HVD) by 2013.
